

KAMALIYA DHARMESH

Back-End Developer

📞 92656 36173 • 📍 Veraval , Gir Somnath • 🌐 www.linkedin.com • ✉️ dharmeshkamliya351@gmail.com

OBJECTIVE

I am a Python Backend Developer with strong experience in frameworks like Django and Flask. Proficient in designing and building scalable, secure, and efficient backend systems, with a solid understanding of RESTful API development, database management (MySQL), and server-side logic. Besides backend expertise, I have good knowledge of frontend technologies such as HTML, CSS, and JavaScript, enabling effective collaboration with frontend teams and contributing to full-stack projects. Through projects, I have demonstrated the ability to learn quickly, adapt to new technologies, and apply analytical thinking to solve real-world problems. Passionate about clean code, best practices, and continuous learning, I am committed to staying updated with industry trends and contributing meaningfully to team success. Dedicated to delivering reliable, high-performance web applications that enhance user experience and meet business goals.

B.K.N.M.U UNIVERSITY

SKILL

- PYTHON
- DJANGO
- HTML
- CSS
- JAVASCRIPT
- BOOTSTRAP

PROJECTS

SOLAR SYSTEM MODEL : • [Solar-Model-link](#)

2022-2025

Solar System Project

Designed and developed an interactive solar system website using HTML, CSS, and JavaScript, showcasing the planets and their characteristics

- Interactive 3D model of the solar system
- Implement CSS grid and flexbox for layout management
- Utilized JavaScript for dayanamic effects and interaction

ANIMALS WIKIPEDIA : • [Animals-wikipedia-link](#)

2022-2025

The Animals Wikipedia is a responsive, user-friendly web application that provides information about various animals. The website uses HTML for structure, CSS for styling, and Bootstrap for responsive design and layout. Users can explore animal facts, categories, and images in an interactive format, making learning about animals fun and accessible.

- Built a dynamic web application that allows users to explore animal facts, images, and behavior using a structured layout and responsive design.
- Each animal page features high-quality images of the animals, which adapt to the layout using CSS for a smooth, attractive presentation.
- Applied modern CSS techniques to ensure the website was visually appealing and easy to navigate.
- In the given link there is only a demo page in which you will not see the details of the animals, who will see my full side.
